## Permanent Link to Clarion Selects Avera for Testing In-Vehicle Infotainment Systems

2021/06/19

Avera's Record & Playback platform. Photo: Avera Avera, a developer of test solutions and services for communications and electronics device makers, announced today that Clarion has selected Avera's Record & Playback solution to validate upcoming in-vehicle entertainment systems and certify that the devices perform well in real-world conditions. Clarion is a global manufacturer and seller of car navigation systems and in-vehicle equipment with a focus on car audio systems. The R&D Division, Experiment and Evaluation Team at Clarion will use Avera's R&P platform to record radio signals such as AM, FM, HD Radio, and DAB from key locations around the world and replay them in the Tokyo-based lab where the design team is located. The R&P platform selected by Clarion features: RP-5100, a compact 2-channel RF recorder designed to record live RF signals in the field URT-5000, a software-defined RF Player and Signal Generator RF Studio, high-performance RF record-and-playback software for RF product designers and researchers to facilitate recording, analysis and storage of RF signals DriveView plug-in for synchronized recording/viewing of video, audio, and GPS positioning data The Avera RP-5100 RF Recorder is specifically designed to capture real-world RF signals, with impairments, for navigation as well as broadcast radio and video receiver validation, testing and support. The system has two 20-MHz wide channels that can be tuned on any frequencies from 250 kHz to 2.65 GHz. To address the challenges of validating the RF response with the physical environment, Avera has developed DriveView, a plug-in for the proprietary RF Studio software, offering visual verification by video-recording drive tests. "Clarion needed a platform to record live RF environments and reproduce them in a repeatable manner in their lab. Our R&P solution allows them to go through all the different use cases without having to go back in the field at each testing phase," said Etienne Frenette, VP of Sales, Asia for Avera. "As receivers become more complex, it is imperative that real-world signals and conditions be

recreated for thorough validation and testing in order to help enhance the user experience." "We recognize and appreciate Averna's unique expertise and advanced solutions in device performance testing," commented the R&D Division, Experiment and Evaluation Team at Clarion. "Clarion is dedicated to delivering better products reaching the market faster and Averna is helping us achieve this goal."
